

**GRAND VALLEY
STATE UNIVERSITY**
CHARTER SCHOOLS OFFICE

EDG 641 03

**TEACHING FOR TALENT DEVELOPMENT:
DIFFERENTIATED INSTRUCTION**

This course is designed to provide educators with the resources to create a learning environment that will maximize the potential for student success by using the strategies associated with differentiated instruction. In this course the educator will gain knowledge of how to manage instructional time in a way that meets the standards and also provides motivating, challenging, and meaningful experiences for students by differentiating instruction.

Participants will be presented with a variety of strategies for differentiating instruction by establishing a foundation in the principles of differentiated instruction. They will understand what defines differentiation and recognize their role and responsibilities in a differentiated learning community. Practical applications of how to differentiate with the content, process, and product will be explored while planning differentiated lessons. They will establish quality criteria and assessments to clarify and evaluate assignments. At the end of this course the educator will possess a repertoire of strategies for differentiating instruction that will allow them to respond to the diverse needs of the students in their classroom.
